

Anops = synonym

Osteen, 1815,

Lernaeopodoida
Chondracanthidae.

A. radiatus.^①

This is almost certainly the same
genus as had been named Chondracanthus
by De la Roche in 1811.

a privative and $\phi = \text{eye} - \text{i.e. without eyes.}$

Anops, Oken, 1815-6.

Chondracanthidae

Established by Oken (1815-6, p. 358) for several species that had up to that time been called Lernaea. But it is the same as Chondracanthus, which had been published by DeLarocche in 1811.

Oken included in it To. cornuta, cy-
clopterina, cyprinacea, gobina, huchonis,
lotae, nodosa, pectoralis, pinnarum, radia-
ta (type sp.), salmonae.
