

Pontellidae - Calanoida.

Aphelura = synonym.

Brady, 1914.

A. typica ^(M).

Syn. Aphelura Brady, 1914, p. 26.

Aphelura Brady, 1915, p. 139.

Probably a transitional stage of Pontella.

Body tapered anteriorly: forehead with a bifurcate rostrum. Urosome 2-segd in ♀, 3-segd in ♂. First antennae shorter than metasome, 12- to 14-segd: second antennae and mouth parts as in Pontella. Exopods of first 4 pairs of legs 2-segd, endopods 1-segd: 5th legs wanting in female, in the male cylindrical, rudimentary, each made of 1 basipod segt and a 1-segd exopod and endopod, the former 4 times as long as the latter. One pair of simple lenticular eyes.

ApheLura ^{Pontellidae - Calanoida,} typica Brady, ♀.

— — Brady, 1914, p. 26;

— — Brady, 1915, p. 139.

Probably a development stage of
Pontella natalis.
