

## Who is who in sponge science 2017 p. 1

This global address list reflects information as compiled by Christine Schönberg between December 2014 and February 2017. It was collated through annual surveys posted on mailing lists (PoriferaList, CoraList and Skolithos) and by contacting some people directly. Please cite this resource as **Schönberg CHL (2017) Who is who in sponge science 2017**. In: **Van Soest RWM, Boury-Esnault N, Hooper JNA, Rützler K, de Voogd NJ, Alvarez de Glasby B, Hajdu E, Pisera AB, Manconi R, Schönberg CHL, Janussen D, Tabachnick KR, Klautau M, Picton B, Kelly M, Vacelet J, Dohrmann M, Díaz M-C, Cárdenas P (2017) World Porifera Database**. Accessed at <http://www.marinespecies.org/porifera> on [present date].

If people continue to inform Christine of changes (corrections, new arrivals, changes of circumstances or leaving sponge sciences), this list can be updated and published once per year, creating an overview over time that will show the evolution of the community of sponge scientists over time. Christine will post her address change via PoriferaList (JISCMail) if applicable.

Entries in black: Active sponge scientists, who have confirmed their entries in this list or were entered by their supervisors. People were listed here regardless of the percentage of time spent working on sponges (although by far most stated that they work 100% of their time on sponges) and regardless of their career status (including amateurs, students, early to late career sponge workers and active retirees).

Entries in grey: People who would like to stay connected to sponge science, but are not presently actively contributing to it.

The last column states when displayed information was entered or last checked to provide a measure of accuracy. People who do not provide updates within 5 years will be assumed as inactive in sponge science and thereafter listed in grey or deleted from the list.

11	Alvarez de Glasby	Belinda	-	Systematics and taxonomy of marine sponges	Lund University, Department of Geology, Sölvegatan 1, SE-223 62 Lund, SWEDEN	belinda.alvarez@geol.lu.se	<a href="http://www.geol.lu.se/persinfo/detailen.php?uid=268">http://www.geol.lu.se/persinfo/detailen.php?uid=268</a>	2016; A great majority of sponges, including freshwater ones, build up their skeletons with siliceous spicules. The composition, size and arrangement of the spicules in sponge skeletons are commonly used characters in the identification and evolutionary studies of the group. It has been demonstrated that the concentration of dissolved silica of ancient and recent aquatic environments might be a factor that alters the rates of silica deposition of sponge spicules. Thus the use of spicule morphology and morphometrics in sponge systematics and taxonomy becomes a debatable issue and a subject for my research with the biogeochemistry group of Prof Daniel Conley.

33	Bell Colin	Lori	J.	Biogeography of Indo-Pacific sponges, Palau	Coral Reef Research Foundation, PO Box 1765, PW 96940, PALAU	crrfpalau@gmail.com	<a href="http://www.coralreefresearchfoundation.org">http://www.coralreefresearchfoundation.org</a>	2016; Coral Reef Research Foundation (CRRF), transferred its specimen reference collection from Palau to California Academy of Sciences in San Francisco in Oct 2015. This collection contains approx. 5,000 specimens from ~32 different countries or geographic entities in the tropical Indo-Pacific [collections were made through contracts with the US National Cancer Institute between 1992 and 2014]. [Unfortunately about 1/3 of the collection was lost after a devastating fire from a car crash in May 2015.] The majority of the sponges have been identified to "species" so they can be distinguished from others within this collection. In addition, with Michelle Kelly, we have completed first edition of a NIWA/CRRF e-guide to sponges of Palau.

77	Colin	Lori	J. Bell	Biogeography of Indo-Pacific sponges, Palau	Coral Reef Research Foundation, Box 1765, Koror, PW 96940, PALAU	crrfpalau@gmail.com	<a href="http://www.coralreefresearchfoundation.org">http://www.coralreefresearchfoundation.org</a>	2016; Coral Reef Research Foundation (CRRF), transferred its specimen reference collection from Palau to California Academy of Sciences in San Francisco in Oct 2015. This collection contains aprox. 5,000 specimens from ~32 different countries or geographic entities in the tropical Indo-Pacific [collections were made through contracts with the US National Cancer Institute between 1992 and 2014]. [Unfortunately about 1/3 of the collection was lost after a devastating fire from a car crash in May 2015.] The majority of the sponges have been identified to "species" so they can be distinguished from others within this collection. In addition, with Michelle Kelly, we have completed first edition of a NIWA/CRRF e-guide to sponges of Palau.

152	Goodridge	Renata	-	Basic sponge ID	Centre for Resource Management & Environmental Studies (CERMES), University of the West Indies, BARBADOS	renata.goodridge@cavehill.uwi.edu	http://cavehill.uwi.edu/cermes/	2015; I am the Senior Marine and Lab Technician since 1987 and do plenty of WQ and reef work, but my passion remains with the sponges. I ID sponges since 1988; I visually know many of the sponge species in Barbados and most of the Eastern Caribbean fairly well. I am working on a basic 'visual' sponge guide for Barbados. I keep an eye on what is happening underwater – the dive shops are good about letting someone at CERMES know if they see anything abnormal. I enjoy being in the sea doing field work more than anything. I would like to be involved in some research.

238	Ludeman	Danielle	-	NA	University of Alberta, CANADA	dludeman@ualberta.ca	NA	2015; Finished PhD with Sally Leys, no longer working on sponges
239	Lukić Bilela	Lada	-	Mitochondrial genomics, molecular biodiversity, evolution	Faculty of Science, University of Sarajevo, Zmaja od Bosne 33-35, 71 000 Sarajevo, BOSNIA AND HERZEGOVINA	lbilela@gmail.com; lbilela@pmf.unsa.ba	<a href="https://bib.irb.hr/lista-radova?autor=229620">https://bib.irb.hr/lista-radova?autor=229620</a> ; <a href="https://www.researchgate.net/profile/Lada_Lukic_Bilela">https://www.researchgate.net/profile/Lada_Lukic_Bilela</a> ; <a href="https://scholar.google.com/citations?hl=en&amp;user=2z8LU3oAAAAJ&amp;view_op=list_works">https://scholar.google.com/citations?hl=en&amp;user=2z8LU3oAAAAJ&amp;view_op=list_works</a>	2016
240	Łukowiak	Magdalena	-	Fossil Demospongiae, spicules, spicular analysis	Institute of Paleobiology, Polish Academy of Sciences, Twarda 51/55 00-818 Warsaw, POLAND	mlukowiak@twarda.pan.pl	<a href="http://www.paleo.pan.pl/pracownicy/lukowiak/magdalenalukowiak.html">http://www.paleo.pan.pl/pracownicy/lukowiak/magdalenalukowiak.html</a>	2015; I try to reconstruct ancient sponge communities based on spicular analysis, both as separate elements or fused skeletons, which are (mainly) the only hard parts that we can find in the fossil record. This can give us information how sponge communities have changed through geological time.
241	Luo	Ciu	-	Fossil record of non-spicular sponges, especially keratose and verongid demosponges	Nanjing Institute of Geology and Palaeontology, CAS, 39 East Beijing Road, Nanjing 210008, P.R. CHINA	cluoms@outlook.com	<a href="http://www.researchgate.net/profile/Cui_Luo">http://www.researchgate.net/profile/Cui_Luo</a>	2015; I am interested in the fossil record of non-spicular sponges, especially keratose and verongid demosponges. Sponge taphonomy (processes related to the fossilization of sponges) and (paleo-) ecology need to be investigated. Sponge evolution, which is naturally related to taxonomy of fossils, will probably be taken into my future scope of study as well.

402	Van Duyl	Fleur	C.	Nutrition/role symbionts, bioerosion in relation to eutrophication and acidification, 3D complexity, changes in sponge cover over time	Royal Netherlands Institute for Sea Research (NIOZ), THE NETHERLANDS	Fleur.van.Duyl@nioz.nl	www.nioz.nl; www.acroporanet.nl; researchgate.net/profile/Fleur_vanDuyl/	2015
403	Van Soest	Rob	-	Taxonomy of Porifera	Naturalis Biodiversity Center, Dept. Marine Zoology, Darwinweg 2, 2333CR Leiden, THE NETHERLANDS	rob.vansoest@naturalis.nl	https://science.naturalis.nl/en/people/scientists/rob-van-soest/; Editor World Porifera Database: <a href="http://www.marinespecies.org/porifera/">http://www.marinespecies.org/porifera/</a> ; Identify Northeast Atlantic sponges: <a href="http://species-identification.org/species.php?species_group=sponges&amp;menuentry=inleiding">http://species-identification.org/species.php?species_group=sponges&amp;menuentry=inleiding</a>	2015; The emphasis is on species discovery, revision of genera, and biogeography, guided by materials collected during many past expeditions and fieldwork trips. Next to these activities I will continue to work as editor in chief of the World Porifera Database.
404	Vasconcellos	Vivian	-	Reproduction, evolution	Universidade Federal da Bahia, Instituto de Ciências Biológicas, Salvador - Bahia, BRAZIL	vivianvasconcellos@gmail.com	https://www.researchgate.net/profile/Vivian_Vasconcellos	2015; PhD
405	Vaterlaus	Christian	-	Aquaculture, sponge farming, coral farming, coral reef protection, artificial reefs	marinecultures.org, Ottikerstr.53, 8006 Zurich, SWITZERLAND	c.vaterlaus@marinecultures.org	www.marinecultures.org	Nov 2016; We do community based aquaculture development in Zanzibar, Tanzania to generate jobs and protect the marine environment.
406	Vicente	Jan	-	Sponge-sponge interactions, biomineralisation, ocean acidification	Columbus Center, 701 E Pratt St, Baltimore, MD, 21202 USA	vicentejan@gmail.com	<a href="http://porifera.lifedesks.org/user/34">http://porifera.lifedesks.org/user/34</a> ; <a href="http://www.umces.edu/imet/people/jvicente">http://www.umces.edu/imet/people/jvicente</a>	2015; PhD. Specifically a highly specialized symbiosis between sponges of the genera Plakortis and Xestospongia. I am looking at several molecular aspects of this association including silicatein gene expression between sponge pairs and a free living form of Xestospongia. I am also conducting ocean acidification experiments on these sponge pairs to look at how the process of silica biomineralization is affected in sponges. These are currently the topics of my PhD dissertation which might change once I graduate.
