

Schisturus uncinatus (Oken, 1815)

(*Clavella uncinata*)

Oken 1815 Lehrbuch der Naturgeschichte, p.182

(in his book Oken first proposed three genera for the Lernaeans, Phyllina, Schisturus, and Lernaea. Under the name Schisturus he included 15 species which had been previously included in the genus Lernaea; among these was Müller's Lernaea uncinata. But Rudolphi had used the name Schisturus in 1809 for a genus of worms. But later in the same book p.357, a much better classification of the Lernaeans was proposed. He divided them into four genera, Axine, Clavella, Pennella, and Lernaea. Clavella was new to science, he took as the type Clavella uncinata.)

Schisturus cyclopterus (Gabricius, 1780)

(*Haemobaphes cycloptera*)

Oaken 1816

Lehrbuch Naturgeschichte, p. 183

Schisturus salmoneus Oken, 1816

(*salmincola salmonea*)

Oken 1816 Lehrb. Naturg., p. 183

Schisturus uncinatus (Müller, 1776)

(Clavella uncinata)

Oken 1815 Lehrbuch Naturgesch., p.183
