

Lamippidae - Notodetraphyoida
Poecilostomatoida (M)

Isidicola valid

Gravier, 1914.

I. antarctica

Syn. Isidicola Gravier, 1914, p. 356.

- DUDLEY 1973: 75 -

Distinguished from Lamippe Bruzelius and Linaresia Zulueta by being segmented, and by the feeble development and the ornamentation of the furca. These other genera live in the canals of the caenosarc of alcyonarians, but Isidicola lives in galls.

Lamippidae - Notodelphyoidea

Isidicola antarctica Gravier

— — Gravier, 1914, p. 354 —

-- DUDLEY 1973: 75 —

Host. In galls on *Trimnoisis formosa* & *Mopsea gracilis*
