

(in)

POECILOSTOMATOIDA -

Ergasilidae.

Cyclopoida

Thersitina.

Norman, 1905.

T. gasterostei.

A name suggested in place of Fagenstecher's Thersites, which had been twice preoccupied.

Thersitina Norman, 1905, p. 41.

Thersitina Wilson, 1911, p. 347.

Thersites and the ending inos

Thersites Fagenstecher, 1861, p. 118.

Thersitina T. & A. Scott, 1913, p. 41.

Cephalothorax so much dilated as to be spherical. 1^o anten. short & moderately stout; 2^o pair also stout and even shorter than the 1^o. in marked contrast to Egasilus. Mandibles with a bilobed & pectinate biting part - 1^o maxpd's. simple, with one or two small setae. 2^o pair with an enlarged basal joint, a slender curved arm, and a few strong apical spines. First 3 legs with 3-jointed rami - exopods of 4^o pair with only 2 joints - 5th pair 3-jointed & uniramous. Abdomen slender, & attached at r.a. to ventral surface. 3 slender, 2^o An. 4-jointed - all thorax seg'ts. free.

THERSITINA NORMAN, 1905
