Correction

Article title: A new large predator (Amphipoda, Eusiridae) hidden at hadal depths of the Atacama Trench

Authors: Weston, J. N. J., González, C. E., Escibano, R., & Ulloa, O.

Journal: *Systematics and Biodiversity*

Bibliometrics: Volume 22, Number 1, 2416430

DOI: <https://doi.org/10.1080/14772000.2024.2416430>

Statement of Corrections

Following the publication of Weston et al. (2024), it has come to the authors' attention that the genus name *Dulcinea* Weston & González, 2024 (Malacostraca: Amphipoda) is preoccupied by *Dulcinea* Péringuey, 1907 (Insecta: Coleoptera). Under Article 52 of the International Code of Zoological Nomenclature (ICZN, 1999), the reuse of preoccupied names is prohibited. Per Article 60 of the ICZN, *Dulcibella* nom. nov. is proposed as a replacement name. *Dulcibella* retains the original intent to extend a tradition within the Eusiridae family of paying homage to characters in Miguel de Cervantes' novel Don Quixote while adhering to ICZN rules. According to this application, the following new combination is *Dulcibella camanchaca* Weston & González, 2024, comb. nov.

List of Corrections

- In 54 instances throughout the article, *Dulcinea* was changed to *Dulcibella*, including in the captions for Figures 1–6, Tables 1–3, and the Supplementary Table.
- The genus etymology has been modified to state: “This new genus, *Dulcibella*, extends this tradition with an homage to the character Dulcinea del Toboso. She is the imagined unrequited love of Don Quixote, and the source of all inspiration for love, bravery, and faith. However, the name “*Dulcinea*” is preoccupied by *Dulcinea* Péringuey, 1907 in the insect order Coleoptera. To adhere to Article 52 of the International Code of Zoological Nomenclature (ICZN, 1999), we are paying tribute to the tradition with the name “*Dulcibella*”. Similarly, *Dulcibella* appears in medieval English poetry and literature as an archetypal name for a sweetheart or idealized woman. Derived from *dulcis* (sweet) and *bella* (beautiful), *Dulcibella* reinforces themes of sweetness and beauty.”
- Added a new sentence to the Acknowledgements. “We thank Jimmy Gaudin and Christian Kammerer for quickly bringing *Dulcinea* Péringuey, 1907 to our attention, and we appreciate Rachael Peart and Shane Ah Yong for their advice.”
- New reference added: International Commission on Zoological Nomenclature. (1999). *The International Code of Zoological Nomenclature, Fourth Edition*. Retrieved November 29, 2024, from <https://www.iczn.org/the-code/the-code-online/>
- New reference added: Péringuey, L. (1907). Descriptive catalogue of the Coleoptera of South Africa (Lucanidae and Scarabaeidae). *Transactions of the South African Philosophical Society*, 13, 1–752.
- The name metadata on GenBank and ZooBank has been modified to *Dulcibella* from *Dulcinea*.
- The branch name in Figures 6A & B was changed to *Dulcibella camachaca* sp. nov.
